Election/Restrictions

2. Claims 7 & 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election of Species V shown in Fig. 11 was made **without** traverse in the reply filed on September 4, 2007.

Information Disclosure Statement

3. The information disclosure statement filed November 1, 2007 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered.

Drawings

4. The replacement drawings filed January 22, 2008 are approved.

Claim Rejections - 35 USC § 112

5. Claims 6 & 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation "at least either [≥ 1] of the universal joints is a constant velocity universal joint" in line 11, and the claim also recites "one [$=1$] of the universal joints is the constant velocity joint" in line 13 which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

6. Claims 6 & 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kayser, US 3,204,429. Fig. 1 shows a vehicle steering system comprising an intermediate shaft system including:

an input shaft (see “prime mover” in col. 3, line 39) that could be used for transmitting a rotation from a steering wheel operated by a driver;

an intermediate shaft including an upper immediate shaft 18, a lower intermediate shaft 12 and a connecting device (see “splined” in col. 3, lines 27 & 29) for connecting the upper intermediate shaft to the lower intermediate shaft in such a manner as to enable each to slide in the axial direction and to transmit a rotation there between;

an output shaft (see “prime mover” in col. 4, lines 15 & 16) for driving a steering mechanism on a vehicle; and

universal joints 14, 16 which provide connections, respectively, between the input shaft and the upper intermediate shaft and between the lower intermediate shaft and the output shaft.

Fig. 1 shows the universal joint 16 is a constant velocity ball universal joint (see also col. 3, lines 40 & 41) and the universal joint 14 is a cross universal joint.

Response to Arguments

7. Applicant's arguments filed January 22, 2008 have been fully considered but they are not persuasive. In response to applicant's argument that Kayser does not expressly disclose using the input shaft for transmitting rotation from a steering wheel operated by a driver, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed

invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morgan shows a vehicle steering system.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
